

9 October 1973

MEMORANDUM FOR: Director of Basic and Geographic Intelligence  
SUBJECT : Proposed Discussion with the Environmental Technical  
Applications Center of the USAF

- 25X1A 1. Attached letter draft is our opener for discussions with ETAC experts on long-range (3-5 year) forecasting of climatic trends in parts of the world where drought conditions have had a major impact on the economic situation. [REDACTED] 25X1A  
25X1A [REDACTED] has been investigating the considerable R&D activity in and outside the government on such forecasting and has learned that the people at ETAC are knowledgeable and eager to be of assistance to us if they are officially requested. The formal tasking becomes important because any work done could involve expensive computer time. I am not proposing such tasking now; I merely want to see if there is some pay-dirt at ETAC for us. They apparently are a bit nervous about further informal liaison with CIA.
- 25X1A 2. I have chosen this procedure (letter from D/BGI to head of ETAC) to get officially from here to there on the advice of [REDACTED] DC/IRS, who in turn checked with [REDACTED] 25X1A  
25X1A [REDACTED] asked that DDI concurrence be secured for any major project that might be undertaken. Such concurrence is not required for a letter which merely opened discussions.

25X1A

[REDACTED]  
Chief, Geography Division
